ENZO

INODORO CON SALIDA VERTICAL • VERTICAL TOILET

Ref. 00996

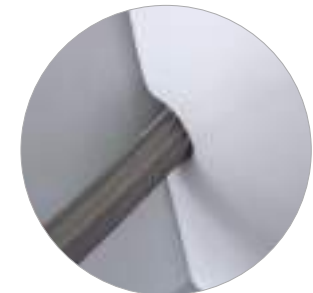

**UN NUEVO CONCEPTO DE INODORO
A NEW CONCEPT OF TOILET**

El inodoro sin cisterna Enzo se sirve de la idea de emplear agua directa como método de desagüe. Su sistema, con solo pulsar el botón lateral, impulsa la descarga desde la entrada hasta la salida de modo directo, sin necesidad de acumular agua. Enzo, al no llevar tanque consigo, ahorra espacio en el baño y tediosas instalaciones.

The Enzo cisternless toilet is based on the idea of using direct water as the flush method. The system drives the discharge from the inlet to the outlet directly, without the need to accumulate water. Enzo is ideal for saving bathroom space and tedious installations.
